

# COMPLETE SET OF ELECTRIC SWITCH FOR TROLLEYBUSES - ESKO M24 INCLUDING CONTROL BOX AND TRAFFIC LIGHT

- For Angles 10° and 20°, symmetrical, right or left
- For tension and suspension system
- Fast-paced, speed 50 km/h (2,5°–7,5°)
- Drive type: 12 V electric motor
- Highly reliable limit switches with status signaling
- The switch body in tension frame = easy replacement and service
- Compatible with the older system M12
- Material: stainless steel, bronze, ABS plastic, fiberglass
- Possible to design with electric or mechanical cross
- Control voltage and drive control 24 V DC
- 24 V DC diode traffic light - optional shape
- Programmable fully automatic operation, driver control or switch to manual
- Possibility of control by a radio transmitter, or by a current contact
- Remote supervision of the power supply system and position of switches
- Internal service controlling, optionally external
- Placement on mast, on the wire or between bodies switches

## Control box data-sheet:

Input voltage:	600/750 V DC
Control voltage:	24 V DC
Insulation strength:	4 kV AC
Protection:	IP44 (IP65)
